## PROJECTS

|                                                                                                                                                                                                                                                                                                                                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>AI Assistant for ERP</b>   <i>Laravel, PHP, MySQL, AI APIs, REST APIs</i>                                                                                                                                                                                                                                                                  |
| <ul style="list-style-type: none"><li>Developed an AI-powered assistant for an ERP system that enables users to interact with business data through natural language queries.</li><li>Implemented an AI-based Text-to-SQL workflow to convert natural language questions into SQL queries for business reporting and data analysis.</li></ul> |
| <b>ERP Assistant Modules</b>   <i>Laravel, PHP, Livewire, Filament, MySQL</i>                                                                                                                                                                                                                                                                 |
| <ul style="list-style-type: none"><li>Developed and maintained ERP modules for products, inventory, sales, purchases, customers, suppliers, and business operations.</li><li>Built interactive dashboards, data tables, forms, filters, and CRUD operations using Laravel, Livewire, and Filament.</li></ul>                                  |

### **AugmentedFaces – Face Recognition System** | *Python, TensorFlow, FaceNet, ArcFace, MTCNN, OpenCV*

- Developed a face recognition system using pretrained FaceNet and ArcFace models for facial feature extraction.
- Implemented face detection and preprocessing using MTCNN and standardized facial images for embedding generation.

### **Multi-Vendor E-Commerce System** | *Laravel, PHP, MySQL, Livewire, JavaScript, Bootstrap*

- Developed a multi-vendor e-commerce platform supporting customers, vendors, and administrators through dedicated workflows.
- Implemented product management, categories, vendor management, shopping cart, checkout, orders, and customer functionality.

### **SaaS Multi-Tenant Platform** | *Laravel, PHP, MySQL, Livewire, Filament*

- Developed a multi-tenant SaaS application architecture using Laravel for managing separate business environments.
- Implemented tenant-based data management, authentication, database relationships, and role-based functionality.

### **Rently – Rental Management System** | *Laravel, PHP, MySQL, Livewire, Bootstrap*

- Developed a Laravel-based rental management application for managing users, rental listings, and booking workflows.
- Implemented authentication, CRUD operations, database relationships, validation, and responsive interfaces.

### **Dil Se Decor.pk – E-Commerce System** | *Laravel, PHP, MySQL, JavaScript, Bootstrap*

- Developed an e-commerce website for browsing and purchasing home decor products.
- Implemented product catalog, categories, shopping cart, checkout, order management, and customer workflows.

### **Food Restaurant Website** | *HTML, CSS, JavaScript, Bootstrap*

- Developed a responsive food restaurant website allowing users to browse food categories, explore products, and submit order details.

## TECHNICAL SKILLS

---

**Languages:** PHP, JavaScript, Python, Java, SQL, HTML, CSS, Dart

**Frameworks:** Laravel, React.js, Livewire, Filament, Bootstrap, Tailwind CSS, Flutter

**Testing:** PHPUnit, PEST, Software Testing

**AI/ML:** TensorFlow, PyTorch, FaceNet, ArcFace, OpenCV, NumPy, Pandas

**Backend:** Laravel API Development, REST APIs, JSON, OOP

**Databases:** MySQL

**Developer Tools:** Git, GitHub, GitLab, XAMPP, VS Code, Google Colab

**Development:** Full-Stack Development, Frontend Development, Backend Development, API Integration, Database Architecture

**Methodologies:** SDLC, Agile

**Other:** Data Structures and Algorithms, Figma

## CERTIFICATIONS
